

## Environmental Issues

1) Give two reasons why we must stop burning fossil fuels?

---

---

2) Where in the world, will the effects of global warming be most serious?

---

3) What is biomass?

---

---

4) Why is the use of wave power and solar power to create electricity not more common?

---

5) What other benefits can wind power offer in addition to being clean, renewable and sustainable?

---

---

6) Although hydro power is considered clean and renewable, there are still environmental consequences. Can you think of two?

(a) \_\_\_\_\_

(b) \_\_\_\_\_

**PROJECT:** Find out more about one or both of the following:  
(a) nuclear waste (b) acid rain.
